

Senior Environmental Scientist/Project Coordinator

Description

NorthStream Environmental Consulting Ltd. is a locally owned and operated company providing environmental consulting and project management services to oil and gas, mining, renewable energy, utility, and municipal sectors throughout Western Canada. NorthStream is an equal opportunity employer, committed to a diverse workforce. We offer competitive wages, earned days off, flexible work hours, a complete range of employee benefits, and staff functions/team-building events.

NorthStream is seeking an **Intermediate to Senior Environmental Scientist/Project Coordinator** to join our team in **Saskatoon, Saskatchewan**. This position is based on full-time employment. The successful candidate will report to the Project Manager. This position offers an interesting variety of office and field work on a diverse range of projects from rare/endangered species inventories, environmental assessments, to monitoring of environmental impacts. The position will include work outside regular office hours. Although the position will be based in Saskatoon, travel throughout Saskatchewan will be required.

Responsibilities and Duties

Responsibilities include, but are not limited to:

- Coordinating and managing projects
- Working closely with a multi-disciplinary team of professionals and technical experts in the environmental sector
- Ensuring compliance with all environment permits, regulatory requirements, legislation, and government approvals
- Implementation of environmental field studies (i.e. environmental assessments and mitigation plans)
- Wildlife and vegetation field support (i.e. nest sweeps, breeding bird surveys, prairie terrestrial transects)
- Environmental monitoring
- Client, contractor, and regulatory liaison
- Data collection, analysis, and interpretation
- Completing daily field reports and safety documentation
- Preparation of technical reports and development of recommendations for site-specific environmental protection measures

Qualifications and Skills

- Post-secondary degree or diploma in biology, environmental science, or related studies
- A minimum of four (4) years environmental monitoring experience in construction monitoring for oilfield, pipeline, power line, mining or relevant industrial and/or commercial projects
- Valid driver's license
- Meets or exceeds Personnel Requirements for Species Detection Survey Protocols, specifically in migratory birds and vascular plants
- Knowledge of Saskatchewan regulatory requirements, legislation, and government approvals related to oil and gas, wetlands, Crown land, species at risk, and migratory birds
- Understanding of the Canadian Wetland Classification System and Stewart and Kantrud Wetland Classification System

- Effective technical report writing skills, and experience with data collection, analysis, and interpretation
- Excellent written and verbal communication skills and ability to communicate effectively with clients, regulatory agencies, stakeholders, and the public
- Strong organizational, interpersonal, and problem-solving skills
- Ability to manage time and resources effectively with minimal supervision

Preference given to candidates registered as a Professional (or Articling) Biologist or Agrologist

Interested candidates are requested to forward a resume and cover letter directly to **apply@north-stream.ca** no later than the **June 5, 2019 closing date**. We thank all applicants for their interest; however, only qualified applicants will be contacted for interviews. The posting may be filled prior to the closing date.

****Only Canadian Residents Need Apply****
